Customer Journey Map

Date	1 October 2026
Team ID	SWTID-2026-6912
Project Name	FitBuddy - AI Fitness Plan Generator using Gemini Models
Maximum Marks	2 Marks

Customer Journey Map

Map out the user's experience stage-by-stage, capturing actions, touchpoints, thoughts, feelings, process ownership and improvement opportunities for FitBuddy.

Phase of Journey	Stage 1 Discover & Enter Details	Stage 2 Generate & Receive Plan	Stage 3 Feedback & Update
Actions What does the customer do?	• Opens FitBuddy • Enters name, age, weight • Selects goal & intensity	• Submits the form • Receives 7-day workout plan • Views nutrition/recovery tip	• Reviews the plan • Enters feedback • Receives updated plan
Touchpoint What part of the service do they interact with?	• index.html form • Goal/intensity fields • Generate Plan button	• FastAPI endpoint • Gemini Pro/Flash • result.html	• Feedback form • Gemini Pro update • Updated result / admin view
Customer Thought What is the customer thinking?	• Is this easy to use? • Will the plan match my goal? • Can I choose intensity?	• Is the plan personalized? • Are the exercises clear? • What nutrition tip fits me?	• Can I improve this plan? • Will my feedback be used? • Can I track changes?
Customer Feeling What is the customer feeling?	• Curious • Hopeful • Motivated	• Interested • Engaged • Encouraged	• Supported • Involved • More confident

Process Ownership Who is in the lead on this?	Pavithra M Team Leader Manisha S Gemini AI integration	Monica G FastAPI backend & database Monisha Anandan Frontend & Jinja2	Mridula M Testing, deployment & documentation Team Final review & coordination
Opportunities How can we improve this stage?	• Make onboarding simple • Validate user inputs • Use clear goal/intensity choices	• Improve response clarity • Keep plans structured day-wise • Show useful nutrition/recovery tips	• Make feedback specific • Preserve original + updated plans • Test all routes and mobile UI

Team Work Allocation

Name	Role	Assigned Work
Pavithra M	Team Leader	Project coordination; model selection and application architecture; task tracking; final integration review.
Manisha S	Team Member	Gemini AI layer: workout-plan generation, nutrition/recovery tip generation, prompts and AI response integration.
Monica G	Team Member	FastAPI backend: routes, form handling, Pydantic validation, SQLite/SQLAlchemy data storage and plan update logic.
Monisha Anandan	Team Member	Frontend: HTML/CSS UI, Jinja2 templates, result page, feedback form and admin-view presentation.
Mridula M	Team Member	Testing and deployment: local server verification, endpoint testing, bug tracking, documentation and final demo preparation.

Project basis: The allocation follows the FitBuddy workflow described in the supplied project document: Gemini model selection and architecture, core AI functionality, FastAPI/routes, Jinja2 frontend, database, testing and local deployment.

Project technology: FastAPI • Google Gemini models • SQLite/SQLAlchemy • HTML/CSS • Jinja2 • Uvicorn
