Empathy Map

Date	1 October 2026
Team ID	SWTID-2026-6912
Project Name	FitBuddy - AI Fitness Plan Generator using Gemini Models
Maximum Marks	4 Marks

Empathy Map
Create an empathy map to understand the FitBuddy user from four perspectives — what they Say, Think, Do, and Feel — in relation to personalized fitness planning. The map focuses on users seeking a structured workout plan, nutrition/recovery tips, and the ability to refine plans using feedback.

SAYS
- "I want a workout plan suited to my fitness goal."
- "I need something simple and easy to follow."
- "I want to change the plan if it is too difficult."

PERSONA

Fitness User

Goal-oriented user seeking a personalized 7-day plan

THINKS
- "Will this plan match my goal and intensity?"
- "Can AI personalize the routine for me?"
- "I want useful nutrition or recovery guidance too."

DOES
- Enters age, weight, goal, and workout intensity.
- Uses the generated 7-day workout plan.
- Submits feedback to refine the plan.

USER TYPE

Beginner / Intermediate fitness user

FEELS
- Motivated when the plan is personalized.
- Confident when instructions are structured.
- Frustrated when a routine does not fit their needs.

Team Work Allocation

Responsibilities are assigned in the same order as the names provided, aligned with the FitBuddy project workflow and milestones.

S.No.	Name	Role / Responsibility	Key Work
1	**Pavithra M**	Team Leader & AI/Architecture Lead	Coordinate the team; research and select Gemini models; define system architecture; oversee integration of Gemini Pro/Flash with FastAPI.
2	**Manisha S**	Backend Development Lead	Develop FastAPI backend; handle user input and validation; implement API routes and connect backend logic to database operations.
3	**Monica G**	AI Logic & Route Integration	Work on workout generation, nutrition/recovery tip generation, feedback-based plan updates, and integration of AI functions in routes.py.
4	**Monisha Anandan**	Frontend & UI Developer	Design index.html, result.html, and all_users.html; build responsive CSS/Jinja2 templates; ensure clear user flow and presentation of plans.
5	**Mridula M**	Database, Testing & Deployment	Support SQLite/SQLAlchemy data storage; test plan generation, feedback updates and admin view; verify local deployment with Uvicorn and prepare documentation.

Milestone-wise Coordination

Project Milestone	Primary Members
1. Model Selection & Architecture	Pavithra M + Monica G
2. Core Functionalities & FastAPI Backend	Manisha S + Monica G
3. routes.py Development	Manisha S + Monica G
4. Frontend Development	Monisha Anandan
5. Deployment, Testing & Documentation	Mridula M + Pavithra M

Project basis: The allocation follows the uploaded FitBuddy project workflow: model selection and architecture, core functionality/backend, routes.py, frontend/Jinja2, and deployment/testing.
